

SLURRY-MÓR

Biologically
Enhancing
Your Slurry

Slurry Mór contains a range of naturally occurring micro-organisms. Slurry-Mór makes slurry which is sometimes treated as a waste ingredient into a product that accelerates the performance of your grass and soil.

Benefits

Improves soil health and biology (worm friendly)

Reduces agitation time

Reduces crust formation thus reducing noxious gases and odours

Increases nutrient retention in particular Nitrogen

Application rate:

1 kg per 40,000 gallons of slurry. This rate may need to be increased if there is heavy crust formation.
